Academic Project Experience

Kenzie Academy
Associate Front-End Web Development | Project Based Training

Remote Training
February 2021 - August 2021

- Displayed ability to grasp new concepts through an intense project based 6 month technical program, ultimately graduating with a 97.7%; earning an Associate Front-End Web Development Certification.
- Gained proficiency with technologies including HTML, CSS, JavaScript, Test Driven Development, Git, Api's and Object Oriented Programming.
- Ability to demonstrate proficient manipulation of the DOM.
- Thorough testing and debugging skills with browser console and external tools.
- Adept knowledge of Operating systems, and computer functionality.
- Strong organizational skills with the ability to multitask in a fast-paced environment.
- Excel at developing new skills independently through online resources such as articles, sites like MDN, videos, and online courses.

Hands-on Experience in an Agile Environment:

- **Portfolio Site**
 - Deployed a website dedicated to showcasing different programming concepts such as:
 - HTML
 - CSS
 - JavaScript
 - JQuery
 - **Projects Hosted on [Portfolio site](#):** Applications I've worked on through the Technical Program
 - **[Capstone Project](#):** Constructed and designed an trivia quiz application utilizing the JService API, which allowed the user to take part in a randomized quiz that tracked the users score, and reset the game on a loss.
 - **[Pig Latin/Unit Testing](#):** Intuitively figured out a way to transform common words into Pig Latin versions of themselves; utilizing a plethora of array methods, and starting the development process with Test Driven Development.

- [Geolocation API/ Image Retrieval](#): Built an application which retrieves 5 images based on users location. User has to click the provided button to toggle through the 5 images; they are then instructed to restart the retrieval process.
